# San Diego Energy Storage Fire Solution

## Overview

---

What happened at Gateway Energy Storage in San Diego?

The fire broke out on Wednesday at the 250MW Gateway Energy Storage facility owned by grid infrastructure developer LS Power in San Diego. A fire crew managed to get the blaze at the 16,000-square foot facility under control after around 24 hours, lifting evacuation orders that were made.

What happened at California's largest lithium-ion battery energy storage facility?

A fire at a California lithium-ion battery energy storage facility once described as the world's largest has burned for five days, prompting evacuation orders. The fire broke out on Wednesday at the 250MW Gateway Energy Storage facility owned by grid infrastructure developer LS Power in San Diego.

Will Escondido impose a moratorium on energy storage sites?

Following last week's lithium battery fire at an Escondido storage facility that prompted evacuation orders and warnings, county supervisors Wednesday approved policies regulating the approval and operation of future energy-storage sites in unincorporated areas, but stopped short of imposing a moratorium on new facilities.

What is the largest battery energy storage project in the world?

The San Diego battery facility came online in 2020 and was billed at the time by grid infrastructure developer LS Power as the largest battery energy storage project in the world. Using LG Chem Lithium-ion cells, it beat the previous record held by a 150MW project in Australia, although has since been surpassed by other facilities.

How many firefighters fought the San Diego Blaze?

It has taken 40 firefighters to contain the blaze, it said. The San Diego battery facility came online in 2020 and was billed at the time by grid infrastructure

developer LS Power as the largest battery energy storage project in the world.

How much energy would a Bess project store?

The project would be capable of storing up to 320 megawatts or 1,280 megawatt hours worth of energy -- several times larger than the facility where the fire continues to burn. Without the BESS facilities, the county could have a difficult time meeting its climate goals.
