Overview

What is an uninterruptible power supply (UPS)?

Uninterruptible power supplies (UPS) are essential to ensure you have continuous power during a power outage. From a small UPS to save and shut down your PC, to large commercial systems that power large data centers or critical systems in hospitals, we have the solutions you and your customers demand.

What is a s3k uninterruptible power supply mini-tower?

The S3K uninterruptible power supply mini-tower is an economical choice for those applications requiring the performance of a sinewave output, line interactive UPS with the mini-tower shape for cabinet installations.

How does the s3k series uninterruptible power supply work?

The S3K Series uninterruptible power supply protects against most severe power disturbances including over/under voltages through state of art, line-interactive technology - most power disturbance corrections are accomplished without transferring to the internal battery.

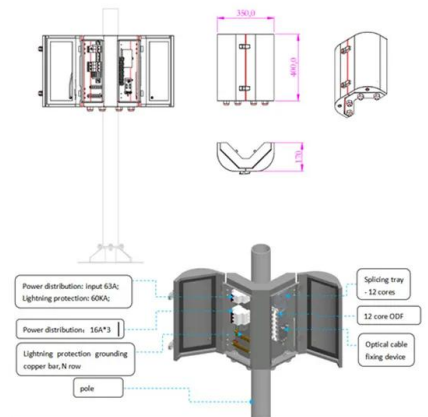

What are DC UPS solutions for control cabinet mounting?

The DC UPS solutions for control cabinet mounting offer reliable protection against power failure, flicker or DC voltage drip of embedded box PCs, measurement and control technology, control systems/PLCs, sensors, camera and security systems and much more.
