Overview

Will China build a 100-megawatt solar plant in Botswana?

A group of Chinese companies, led by China Harbour Engineering Co., has won a contract to build a 100-megawatt (MW) solar plant in Botswana. This development is part of China's commitment to clean energy and sustainable development.

How much does Botswana's solar project cost?

The project is a key development in Botswana's renewable energy sector, marking the country's second utility-scale solar facility. The contract which is valued at \$78.3 million includes partnerships with China Water and Electric Development Co. and local investors.

When will Botswana's second solar power plant be completed?

The project which is Botswana's second utility-scale solar facility is set to be completed in the second quarter of 2026. Botswana has awarded a major contract to build a 100-megawatt solar power plant to a group of Chinese companies led by China Harbour Engineering Co.

How much does a solar plant cost in Gaborone?

The solar plant, valued at US\$78.3 million (R1.4 billion), is set to be completed by the second quarter of 2026, according to Zhitong Finance. The contract signing took place on Monday in Jwaneng, which is a diamond mining town located 200 kilometers west of the capital, Gaborone.

Where is Scatec ASA building a solar power plant in Botswana?

In March, Scatec ASA began construction of a 100-megawatt solar power plant in Botswana's northeast. The initial 60 megawatts of this project are expected to come online by the end of this year. The Ministry of Minerals and Energy is also working on additional renewable energy projects.

Why is Botswana partnering with the World Bank?

Furthermore, the Botswana government is partnering with the World Bank to implement two 50MW battery storage systems, which will support both the Jwaneng solar plant and Scatec's project. This partnership between China and Botswana shows a step towards sustainable energy development and mutual benefits for both nations.
