At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.

What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

What is shipping container solar lighting?

Shipping container solar lighting will be your best solution. No cords to worry about and no worry about loosing power. The shipping container solar lighting system is very simple and maintenance free. The 12V battery provide power

to the LED lights and the solar panel provide power to the battery through the charging controller.

What is a solar PV container?

The Solar PV Container is a containerized solar power solution. It has been designed with the aim of combining solar electricity production and mobility to provide this electricity everywhere around the world.
