

## Solar Storage Container Solutions

# South America solar lights 160 000 milliwatts

## Overview

---

Which country has the most solar power in Latin America?

Situated near the equator, Brazil is more advantaged thanks to ample sunlight and has emerged as the leading market leader in Latin America over recent years. This year, Brazil will have around 16.3-17.5 GW of PV demand, representing a 65% share in the region.

Which countries have the biggest solar market in Latin America?

Brazil remained the biggest market on the Latin American continent, with other nations like Chile, Colombia, and Costa Rica showing diversity in renewable progress. On the other hand, Chile's massive solar curtailment through the year shows the challenges that still affect the sector on the continent.

Will solar energy grow in Latin America in 2024?

The year 2024 carried the momentum from previous years, which made the solar sector bloom on the continent, setting a positive growth trend through at least the next decade. In its May 2024 report, BMI estimated that solar energy generation's market share across Latin America will increase from 6 percent in 2024 to 10 percent by 2033.

Which country has the largest solar energy investment in South America?

Enel Colombia last month began commercial operations of a 370 MW solar PV project. In January 2025, the 144 MW solar park in Monteria was launched, marking one of the largest solar investments in the country, totaling USD 200 million. Brazil is the leader in solar energy in South America as it surpassed 50 GW of installed capacity in 2024.

Why is solar energy important in Latin America?

Solar energy, which is at the helm of global energy transition goals, is a crucial energy source powering the transition for the South American continent as

well. Latin America receives some of the highest solar radiation in the world, making it a hub for solar energy and photovoltaic systems.

How will PV demand change in Latin America in 2024?

The Latin American market will continue to post slow growth, with demand slightly decreasing next year. The outlook for Brazil is gloomy, which will directly influence the rest of Latin America. Overall, PV demand in Latin America will dip to approximately 22-25.2 GW in 2024.
