St John s City New Energy Battery Cabinet Repair

Overview

Why does Saint John energy use a battery system?

It also helps store extra electricity when the demand is low and helps address peak energy demands during the coldest winter months. The battery system may also help Saint John Energy provide power to customers during power outages due to storm events.

What is the largest battery project in New Brunswick?

The battery project is the largest battery in New Brunswick. It consists of a 5.8 megawatt / 11.6 megawatt-hour lithium-ion battery that can deliver 5.8 megawatts of energy to the Saint John Energy grid for a two-hour period on a full charge.

Why does Canada support green energy projects in Saint John?

The Government of Canada is pleased to support this important initiative in Saint John, co-led by the Neqotkuk First Nation.” “One of our traditional values as a nation is to take care of the environment. Green energy projects are going to start taking over, and they're going to dominate, and that's the way of the future.”.
