## Overview

---

Why should you buy a portable power station?

Here are the best reasons to invest in a portable power station: It's quiet. Since it doesn't have an engine, a portable power station is very quiet. Many don't even have a cooling fan, so those—including those we've tested—are dead silent.

How long does a portable power station last?

The lifespan of a portable power station depends on the battery chemistry and how often you use and recharge the battery. Longer lasting LFP batteries used by Bluetti and Anker, as well as some of the newer Ecoflow power stations are rated for 3000 recharges.

How to choose a portable power station?

Arguably, the battery chemistry of your portable power station is the single most important factor. Once you choose the battery chemistry, the only other thing you need to decide on is size based on your power needs.

What is the best portable power station for home backup?

No one wants to sit in the dark, especially when a reliable backup can keep everything running smoothly. After testing and comparing, the best portable power station for home backup is the EF ECOFLOW DELTA 2 Max Portable Power Station. It charges fast, powers most home essentials, and holds up over time. Power outages aren't just annoying.

Do portable power stations have AC outlets?

Portable power stations offer many different outputs in addition to these, including AC outlets, 12V vehicle "cigarette" plugs, 30A 120V AC plugs, and more. Is it worth getting a portable power station?

.

What appliances can a portable power station run?

Depending on the size of the portable power station, they can run 99% of common household appliances. The main exceptions are some extra large induction cook tops, really deep wells with overpowered pumps, large heat pumps, and large electric dryers.
