# Standards for outdoor power supply in Manchester UK

## Overview

---

Where can I find a notice of publication for external power supplies?

Notices of publication from the Department for Business, Energy and Industrial Strategy are provided above for designated standards for external power supplies in relation to ecodesign and energy labelling.

Are there any changes to the electrical equipment (safety) regulations 2016?

Please be aware that it is an amendment and not the complete list. Standards used for electrical equipment designed for use within certain voltage limits in support of the Electrical Equipment (Safety) Regulations 2016 (S.I. 2016/1101) have been amended, and the changes can be seen in Annex 1 of Publication 0061/22.

What types of electrical equipment are covered by the electrical regulations?

Scope The Regulations apply to all electrical equipment that is designed or adapted for use between 50 and 1,000 volts (in the case of alternating current) and 75 and 1,500 volts (in the case of direct current). The Regulations cover domestic electrical equipment and equipment that is intended for use in the workplace.

What is an outdoor socket?

An outdoor socket which is only to be used to power things like outdoor lights, a jet wash or a lawnmower can sometimes be spurred from the back of an existing socket in the house, minimising damage and disruption.

When are designated standards used by manufacturers?

For this reason, when U.K. designated standards exist, they are commonly used by manufacturers. On Aug. 9, 2022, the U.K. updated the designated standards manufacturers can use to assess conformity to regulatory requirements for electrical equipment.

What type of cable should be used for outdoor sockets?

The cable supplying the outdoor socket must be capable of carrying the current to be used by the socket. The 'rule of thumb' would be 2.5mm T&E for sockets although outdoor installations should often be completed in other types of cable which can have different current carrying characteristics.
