

## Solar Storage Container Solutions

# The latest distribution of new energy base stations in San Diego

## Overview

---

How many megawatts will a new energy storage facility add?

This expansion project will add 100 megawatts (MW) of energy storage capacity to the existing 131 MW facility and is projected to be fully operational by June 2025.

What is shell New Energy partnering with California?

The partnership is part of a 25-year deal between the city and Shell New Energies, which was signed in July 2021. The California Energy Commission has also assisted with the projects by providing \$950,000 in grants.

Who owns the San Diego microgrids?

The projects will be a collaborative effort between San Diego and Shell New Energies, a subsidiary of Shell, who will develop, own, and operate the microgrids. The partnership is part of a 25-year deal between the city and Shell New Energies, which was signed in July 2021.

Why did SDG&E lower the average monthly electric delivery bill?

In fact, SDG&E was able to lower the average monthly electric delivery bill for residential customers for the second year in a row, in part, because the company returned \$200 million in federal tax credits to customers for recently completed battery storage.
