There is outdoor power supply in Latvia

Overview

What is Latvia's energy system?

Latvia's energy system is largely based on renewable resources, primarily hydropower from the Daugava River, supplemented by wind, solar, and biomass. While natural gas imports cover energy shortages, the country aims to increase wind and solar energy capacity, with significant progress already made in 2022.

What are the different types of energy sources in Latvia?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important energy source in lower-income settings. Latvia: How much of the country's energy comes from nuclear power?

.

Does Latvia have a good energy infrastructure?

Generally, Latvia has good results in ensuring Energy sustainability, affordability and security. However, the current geopolitical situation, especially Russia's invasion of Ukraine, underscores the importance of cybersecurity and digital innovation in energy infrastructure.

Which energy products are most dynamically developing in Latvia?

The production of various kinds of energy products from biomass is the most dynamically developing in Latvia. According to data for 2023, about 0.66 TWh was generated from biomass (Fig. 7), i.e. more than 4 times that coming from wind energy. The country operates biomass processing, refining, biogas, biodiesel, bioethanol and pellet production.

Does Latvia have an electricity grid?

Synchronization of the Baltic states with the European electricity grids and desynchronization from the Russian unified energy system. The electricity grid in Latvia, however, is primarily managed by Sadales tīkls, the largest distribution system operator that serves 99% of the country's territory.

Can Latvia sustainably manage our natural resources?

We've already made substantial strides in sustainably managing our natural resources, and the numbers speak for themselves. In 2023, Latvia ranked among the top three countries in the European Union for renewable energy use, with renewables accounting for 43.5% of our energy consumption.
