Tool lithium battery warranty scope

Overview

What is a lithium battery warranty service?

Class 3 (types A and B) and Class 4 power grids are harsh power grid environments. The warranty service is the product assurance service provided within the product warranty scope to resolve lithium battery quality issues. The service includes help desk, remote troubleshooting, and lithium battery spare parts replacement.

How long does a lithium battery last?

The standard warranty period of lithium batteries is one year. If extended warranty is required, consult the SSD and evaluate the maximum service life of lithium batteries based on the battery model and application environment. Extended warranty can be provided within the service life and needs to be quoted.

What happens if a lithium battery fails during the warranty period?

Faulty parts replacement: During the warranty period, if an individual failure is caused by the lithium battery quality problem of Party B, Party B is responsible for delivering qualified parts to the receiving place agreed by both parties within the committed service level agreement (SLA).

What is a CATL warranty?

CATL warrants that the capacity of the Product shall not fade to less than 80% of its nameplate capacity. The capacity fade shall be measured based on the ISO 12405-2:2012 (Electrically propelled road vehicles — Test specification for lithium-ion traction battery packs and systems — Part 2: High-energy applications). Warranty Term.

When does a warranty expire?

Warranty Term. The Limited Warranty shall commence from the Warranty Commencement Date for the respective Product, and expires (A) five (5) years

thereafter or (B)400,000km, whichever is earlier or, if the extended Limited Warranty applies in the Purchase Order , expires (A) seven (7) years thereafter or (B)500,000km, whichever is earlier.
