

## Solar Storage Container Solutions

# UPS automatically shuts down the battery cabinet

 **TAX FREE**    

### ENERGY STORAGE SYSTEM

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

## Overview

---

Does ups Automatically switch off if battery is discharged?

When the UPS runs on battery operation and the battery becomes discharged, the UPS automatically switches off. Yes, when adequate power is restored to the UPS and is within the operating voltage range of the UPS, it will restart in online operation. This is independent with PowerChute software either installed or not.

Can a ups automatically shut down a computer before a battery is discharged?

It is more a matter of personal preference but it is important to understand if you use APC's program (PowerChute), you can configure the UPS to automatically and gracefully shut down your computer BEFORE the batteries fully discharge. To me, that is a HUGE benefit over the Window's app.

Why does my ups keep shutting down?

Sometimes a UPS will shut down when it's overloaded. What UPS?

What Power supply?

Sometimes a UPS will shut down when it's overloaded. What UPS?

What Power supply?

That PSU can draw up to 775 watts. I'm not finding that specific model for the UPS. What is the exact model number?

I'm only finding this. That PSU can draw up to 775 watts.

Does a network ups Automatically Restart after a power failure?

**AUTO-RESTART AFTER EXTENDED POWER FAILURES** All network UPS systems will **GENERALLY** restart automatically when power is restored after an extended power failure that outlasts your battery reserves. But automatic

restart is most-often dependent on having “good” batteries at the moment power is restored.

Does ups automatically restart if batteries fail?

So, when your batteries are still in their prime, your UPS will near certainly restart back into a protected operating mode automatically, with no user input, as power is restored. As batteries begin failing, automatic restart back into a protected operating mode when power is restored becomes more challenging for the UPS to provide.

How do I know if my ups battery needs to be replaced?

You can tell if your UPS battery needs to be replaced if: You’re getting poor voltage readings, meaning a UPS low voltage problem. You’re getting low-battery alarms. You’re noticing an early discharge.
