**Use double glass components  
to make a sun room**

## Overview

---

To maximize a great outdoor view from your home, a sunroom with floor-to-ceiling glass, also called a solarium, could be the right choice for you.

While sunroom location and type are very important, the safety of the glass is also a necessary consideration. Make sure that you ask for tempered.

The structure or frame that holds your sunroom glass should be "thermally broken," meaning that there is a material that insulates the inside part of the frame from the outside.

If you plan on using your sunroom year-round, make sure that you ask to see an insulated glass sample. This will give you a better idea of what type of glass is being used to build your.

What type of glass is used to build a sunroom?

This will give you a better idea of what type of glass is being used to build your room. A truly insulated sunroom is built using double-pane glass - never single pane glass. Between the layers of glass is usually an inert gas such as Argon, which provides a barrier to insulate the room from outside temperatures.

How do I choose the best glass for my sunroom?

Where you choose to build your sunroom will also help determine which type of glass makes the most sense for your unique project. While sunroom location and type are very important, the safety of the glass is also a necessary consideration. Make sure that you ask for tempered glass.

Should you build a sunroom with floor-to-ceiling glass?

To maximize a great outdoor view from your home, a sunroom with floor-to-ceiling glass, also called a solarium, could be the right choice for you. This special sunroom has wall-to-wall glass as well as a glass roof. Where you choose to build your sunroom will also help determine which type of glass makes the most sense for your unique project.

What type of Windows do you need for a sunroom?

Windows for a sunroom are typically 75% glass or more in frames. Choosing the right windows ensures your safety and optimizes the incoming light. Knowing the different types should help. Tempered Glass : Tempered glass will not shatter and is the type typically used for windshields.

What is a sunroom made of?

The entire sunroom is made of wood, from the floor to the ceiling with large spaces for the glass windows. It's a great sunroom for your house, it's not so big and it's a bit elevated, this means you'll also need to build short stairs leading to the room. 3. How To Build A Sunroom For \$250.

What are the different types of sunroom windows?

Many sun room windows are either single or double paned. We recommend double-pane argon gas filled windows for a sunroom in most climates. This may vary by geographical area; however, they are typically the most energy efficient windows. Push-out and horizontal sliding windows are common in sunroom window options. See more types below .
