

Solar Storage Container Solutions

Vilnius multifunctional communication base station lead-acid battery supplier

50KW modular power converter

Flexible Configuration

- Modular Design, Expanding as Required
- Small&Light, Wall Mounted
- Installed in Parallel for Expansion

Powerful Function

- Support PV+ESS
- Grid Support, Equipped with SVG Technology
- On-Grid and Off-Grid Operation

Reliable Protection

- Outdoor IP65 Design
- Sufficient Protection Functions Equipped

Overview

Who manufactures lead-acid batteries in Lithuania?

Today, BATTEC is the only manufacturer of industrial lead-acid batteries in Lithuania and one of the first to produce lithium batteries and energy storage systems. BATTEC leverages extensive experience and ongoing research to produce cutting-edge lead-acid batteries.

Which battery is best for telecom base station backup power?

Among various battery technologies, Lithium Iron Phosphate (LiFePO₄) batteries stand out as the ideal choice for telecom base station backup power due to their high safety, long lifespan, and excellent thermal stability.

What is a lithium battery?

Lithium batteries designed as VRLA battery replacements, primarily serving reserve and hybrid power applications. These batteries adhere to standard lead-acid battery dimensions for seamless integration. Customized lithium battery solutions tailored to diverse applications such as portable equipment, emergency power supply, and mobile devices.

What is a customized lithium battery?

Customized lithium battery solutions tailored to diverse applications such as portable equipment, emergency power supply, and mobile devices. Individualized design and parameters, ranging from 12V to 1500V, with capacity selection to meet your specific needs.

What makes a telecom battery pack compatible with a base station?

Compatibility and Installation Voltage Compatibility: 48V is the standard voltage for telecom base stations, so the battery pack's output voltage must align with base station equipment requirements. Modular Design: A modular structure simplifies installation, maintenance, and scalability.

What is a battery management system (BMS)?

Battery Management System (BMS) The Battery Management System (BMS) is the core component of a LiFePO₄ battery pack, responsible for monitoring and protecting the battery's operational status. A well-designed BMS should include: **Voltage Monitoring:** Real-time monitoring of each cell's voltage to prevent overcharging or over-discharging.
