Contact us today to discuss your air conditioning installation or servicing needs or discuss other solutions for home ventilation in Wellington. Maintain a cool, comfortable home with reliable air conditioning in Wellington.

Why is Wellington a good place to install air conditioning?

Wellington is known for its unique climate, often combining humid days with powerful winds. These conditions mean your system must be appropriately sized and positioned for optimal performance. Our local technicians can select and install air conditioning units that perfectly handle these conditions.

Why should you choose FAS energy for air conditioning Wellington?

Whether you're considering installing your first air conditioning unit or it's time to service or upgrade your current system, FAS Energy is the trusted team for air conditioning Wellington homeowners love. Choosing the right solution—and the right team to install it—is crucial to ensuring maximum comfort in your home.

Who is smart air solutions?

Smart Air Solutions is a family owned business operating in the Wellington region. We don't want to rule the world, we are a niche business providing a bespoke solution for our customers. At every step of the process you will deal with industry qualified people who are top of their game, competent and dedicated to you the client.

Why should you choose solar air conditioners?

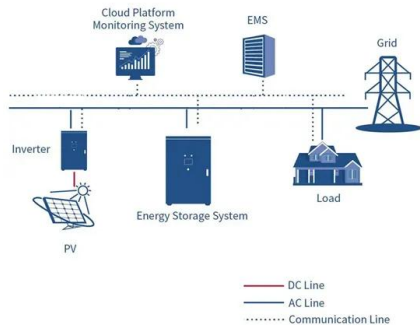

By improving the efficiency through our revolutionary fan design, thus increases the airflow and reducing noise. Our air conditioners produce clean, green cooling and heating. Solar Air Conditioners are manufactured to military

standards and have an internationally recognised quality assurance system in place.

How does a solar air conditioner work?

The next-generation solar air conditioners take the improvements made by inverter technology to the next level. By capturing thermal (ambient) energy, the amount of work the condenser does is reduced under full load and significantly extends the time the compressor is cycled off. Does the thermal panel have to be in direct sunlight?
