What are the battery cabinet platforms in Riga

Overview

Why do we need a battery system in Latvia?

The battery system is an essential infrastructure element for the security and stability of Latvia's energy supply. The batteries will work as modern accumulators for storing large volumes of energy, which will be important for ensuring energy balance once the Latvian electricity supply grid works in sync with the European grid.”.

Does Latvia need a Russian-controlled grid?

The disconnection of the Latvian energy supply system from the Russian-controlled grid is a key condition for achieving Latvia's energy independence and security of energy supply.

What is the most ambitious energy independence project in the Baltics?

Kaspars Melnis, the Minister of Climate and Energy points out: “The most ambitious energy independence project in the Baltics is in its final phase, with major contributions from all the stakeholders. The battery system is an essential infrastructure element for the security and stability of Latvia's energy supply.

When will infrastructure projects in Latvia be completed?

According to the original plan, all infrastructure projects in Latvia will be completed by the end of 2025, with the bulk of the work completed by February 2025, ensuring technical readiness for the safe and stable operation of the system in synchronisation mode. If playback doesn't begin shortly, try restarting your device.
