# What are the battery rooms of Asian communication base stations

## Overview

---

Telecom battery backup systems of communication base stations have high requirements on reliability and stability, so batteries are generally used as backup power to ensure.

In recent years, China's telecom battery backup systems industry has grown rapidly. In the future, it will still benefit from the vigorous construction of 5G communication base.

The upstream of the industry is energy storage equipment and energy storage batteries, the midstream is the manufacturer of.

In the past year, the performance of China's telecom energy storage track was relatively weak, and it was the only field with negative growth among the four major energy storage tracks. According to data, the shipment of telecom battery backup systems batteries in.
