When is Tesla Shanghai energy storage megafactory launching production?

Tesla Shanghai energy storage Megafactory launches production on February 11. Photo: courtesy of Tesla. Tesla held a ceremony on Tuesday to mark the production launch of its Megapack energy storage plant in Shanghai's Lingang New Area, meaning Tesla's China operations has entered a new phase, the Global Times has learned.

What is Tesla's first energy storage facility outside the US?

As Tesla's first energy storage facility outside the US, it represents a \$201.76M investment and a milestone in China. Adjacent to the Gigafactory Shanghai, which produces over 950,000 EVs annually, the Megafactory will be a key export hub. Megapack is a powerful battery.

Where is the Tesla megafactory located?

[Photo/Shanghai Observer] The Tesla Shanghai Megafactory, located in the city's Lin-gang Special Area, officially went into production on Feb 11. The first Megapack, an ultra-large commercial electrochemical energy storage system, has already rolled off the production line, signaling a new phase for Tesla's operations in China.

How many kWh can a Tesla megafactory store?

Each unit can store more than 3,900 kWh of electricity. At the launch ceremony, Mike Snyder, vice president of Energy and Charging at Tesla, stated that the launch of the Shanghai Megafactory for energy storage will ramp up production this quarter, helping Tesla expand into more markets.

Why is Tesla launching a Megapack?

By bolstering Tesla's sustainable energy infrastructure, the Megapack aids in establishing a cleaner grid that safeguards communities and the environment. The Megapack reliably and safely stores energy for the grid, mitigating the

need for gas peaker plants and reducing the risk of outages.
