What is a container generator

Overview

A containerized generator is a specialized type of power generation unit designed to provide reliable and portable electricity in various settings. What is a containerised generator set?

The compact design of containerised generator sets makes them highly mobile and easy to transport. The entire power generation system, including the generator, fuel tank, and control systems, is integrated into a single container.

What is a generator container?

These containers are designed to protect the generator from external elements, ensuring secure operation in diverse environments. The generator sets within these containers can vary in size and capacity, making them suitable for a wide range of applications.

Where can a containerised generator be used?

It can be used in various applications such as remote locations, disaster recovery, events, back-up power and construction sites where there is a need for reliable power supply. Each manufactured containerised generator is acoustically lined to achieve the external sound levels required at your site.

Can you put a generator in a container?

Generators can be put into containers. There are a number of benefits to doing this including: Easier transportation and installation making them ideal for temporary or remote applications. They are more secure as typically they are lockable which prevents unauthorised access. Do I need to service my power system?

Put simply, yes.

What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.

Why do generators need a container structure?

The robust container structure provides enhanced security and durability to the generator set. This protective enclosure safeguards the equipment from adverse weather conditions, dust, and other external factors.
