# What to do if the battery cabinet does not have batteries

## Overview

---

What do I do if the battery cannot be used?

If the «This battery cannot be used Choose battery designated for use in this camera» message is related to a lens error, do the following: Disconnect the lens from the camera and make sure that its metal contacts are clean and intact as well as the lens contacts on the camera body.

How do you store a lithium ion battery?

In general lithium-ion batteries should always be removed from the devices they power and stored at 60-70% of the pack's capacity. If a battery will go unused for three more days, it should be stored in a cabinet or larger store. Once disconnected, storing lithium-ion batteries follows similar principles as the correct storage of chemicals.

How do you store a battery?

Ventilation systems: Disperse hot air and keep closed to prevent fumes in case of a fire . Adequate space: Batteries should be stored on shelving and should not be stacked or allowed to touch each other. Fire detection and fire suppression systems.

Can you store lithium ion batteries in the UK?

The UK doesn't have specific regulations or legislation for the general storage of lithium-ion batteries. The Health and Safety Executive has, however, published guidance on good practices for handling and storing batteries, even though it is not compulsory. Regulations are not prescriptive but instead follow the typical routes:.

Can a battery cause a fire?

A damaged battery can cause a fault to be triggered, which is what often leads to fire. When a faulty battery is in storage and combusts, it may cause other batteries to ignite and releasing toxic, flammable vapours that make the

fire incredibly challenging to manage. Lithium-ion battery fires can even reignite after being contained.

What causes a short circuit in a battery?

The root cause of a short circuit in the battery can come from the cell design, temperature, storage period, state-of-charge, or chemistry. It is considered a risk to store the battery in the open or share a storage unit with anything combustible.

## What to do if the battery cabinet does not have batteries
