Acceptance of new energy sites in operation in Moldova

Overview

What is Moldova's national energy strategy?

To increase the level of clean and domestically-derived energy, Moldova established its National Energy Strategy (NES) for 2030, with three key objectives: Ensuring the security of supply of energy; Developing competitive markets and their regional and European integration; and Ensuring sustainability of the energy sector and climate change mitigation.

What percentage of Moldova's electricity is renewable?

In 2020, renewable electricity accounted for just over 13% of domestic generation in Moldova. Moldova's deployment of wind and solar power has been modest, though, and there remains over 27 GW of potential renewable generation capacity via wind, solar, biomass and hydro. Share of Generation Sources for Electricity Supply, 2019.

What is Moldova's energy policy?

Moldova's energy policy focuses on improving integration in regional markets, strengthening energy security, improving compliance with EU directives, increasing electricity generation capacity and promoting energy efficiency and renewable energy.

When did Moldova join the Energy Community?

Moldova joined the Energy Community as a full-fledged member in March 2010. Moldova, together with the other contracting parties, has the following tasks and obligations: The Energy Community acquis communautaire consists of roughly 25 legal acts.

What happened to Moldova's electricity supply in 2022?

In November 2022 the power station located in Transnistria which produced electricity from Russian gas ceased supplying Moldova with electricity. Electricity was imported from Romania, albeit at a higher cost, helped by a

grant from the EU of €200m.

How has Moldova restructured its electricity distribution network?

As part of the reforms, Moldova restructured and partially privatized its electricity distribution network, including Premier Energy, a private company that controls 70 percent of the country's electric distribution grid.
